Where: Bar Anticipation
703 16th Ave
Belmar, NJ 07719

When: Saturday, June 3rd

Register To Run At:
www.hdsa.org/thwjersyshore

WHAT IS HUNTINGTON'S DISEASE?

Huntington's Disease is a fatal genetic disorder that causes the progressive breakdown of nerve cells in the brain. It deteriorates a person's physical and mental abilities during their prime working years and has no cure. HD is known as the quintessential family disease because every child of a parent with HD has a 50/50 chance of carrying the faulty gene. Today, there are 30,000 symptomatic Americans and more than 200,000 at-risk of inheriting the disease.

Many describe the symptoms of HD as having ALS, Parkinson's and Alzheimer's – simultaneously.
